

# Microsoft Intune Setup Guide

## 1. Follow the Minimum Recommended Baseline Policies

Apply Microsoft's security baselines to ensure all devices follow industry-standard settings (e.g., password policies, encryption).

- ◆ Go to: Intune Admin Center → Endpoint Security → Security Baselines
  - ◆ Select and assign baselines like MDM Security Baseline to user/device groups •
- 

## 2. Set Up Microsoft Intune

Establish the Intune service for your organization.

- ◆ Steps:
    - Sign in at [intune.microsoft.com](https://intune.microsoft.com)
    - Ensure licenses are active
    - Define roles and admin access
    - Set up MDM authority (e.g., Intune MDM)
- 

## 3. Add, Configure, and Protect Apps

Deploy necessary apps and apply protection policies.

- ◆ Steps:
    - Go to Apps > All Apps > Add
    - Choose app type (Win32, iOS, Android, Web, etc.)
    - Assign to groups
    - Apply app protection under App Protection Policies
- 

## 4. Plan for Compliance Policies

Create rules to enforce security like requiring PINs, encryption, or specific OS versions.

- ◆ Steps:

- Go to Devices > Compliance Policies > Create Policy
  - Choose platform, set compliance settings
  - Assign to groups
- 

## 5. Configure Device Features and Enroll Devices

Set up device configuration profiles and allow device enrollment.

### ◆ Steps:

- Navigate to Devices > Configuration Profiles > Create Profile
- Define settings like Wi-Fi, VPN, certificates
- Enroll devices via Devices > Enroll Devices
- Use Company Portal or automated enrollment
